7 Key Features
Designed to Meet the Massage Needs of the Whole Family

DOUBLE 4D INTELLIGENT MASSAGE MECHANISM
UPGRADE THE TRADITIONAL MASSAGE EXPERIENCE

Multidimensional Cooperative Control

The upper and lower movements have clear divisions of labor, and the zonal massage is more precise

Based on 3D movement (up/down, left/right, forward/backward), the 4D mechanism precisely plans and executes complex massage paths using an independent control system. It simulates the natural rhythm of human hand movements like kneading, pushing, and pressing.

neck, shoulders, back,

waist, hips, thighs

4D

Dynamic Detection System

Equipped with pressure, position, and speed sensors, it monitors body curves in real time and automatically adjusts massage strength and position for a smoother experience.

Strength   Width   Speed

130CM EXTENDED SL GUIDE RAIL
Better Fit for the Body

New SL-type long guide rail follows the natural curve of the spine, allowing for a smoother massage from neck to thigh, covering six major areas: neck, shoulder, back, waist, hip, and thigh.

Neck
Shoulder
Back
Waist
Hip
Thigh

Smart Detection for Personalized Massage

Using dual optical sensors, the chair intelligently detects shoulder position and back curve to tailor the massage for users of different heights and body types.
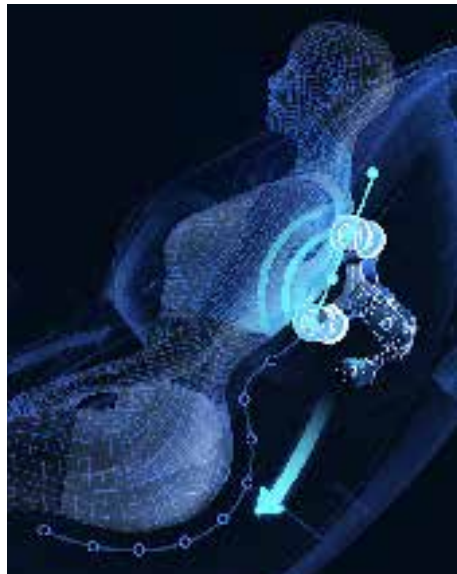

Height Position Detection

Pressure shoulder positioning and full back pick point combination, positioning height massage.

Back Curve Detection

4D tactile detection, adapt to the human body curve changes, massage more accurate fit.
